Daniel Assayag

Product Manager

dseyag@gmail.com +33 6 99 38 56 20 linkedin.com/in/daniel-assayag github.com/danass Paris, 5th, France

Profile

Product Manager specialized in legacy system modernization and product optimization. Expert in detailed specification writing, technical team support, data-driven feature design, and consideration of user needs and business objectives.

Experience

Product Manager, Operations & Product Ops

February 2025 - Present
Paris

HomeExchange

- BACK-OFFICE MIGRATION & PRODUCT MODERNIZATION
  - Migration of a legacy back-office to a modern system, with operational continuity for **~200 internal users** (Customer Care, Sales, Marketing, Ops, PM). Delivery of **~80 features** and optimization of critical modules: Users, Homes, Exchanges, permissions, internal workflows
  - Proven experience on large-scale products: **400,000 impacted users** (**260k active members** + new member flow + **2,500 Collection**). Management of **2.5 million created accounts**
  - BO feature prioritization: in-depth business research, prioritization matrix (business impact, frequency, complexity, dependencies), phased roadmap with progressive releases
  - Operational support for **5 developers** (2 internal + 3 external): ticket writing, technical clarification, investigation, problem resolution, functional arbitration
  - Production of complete specifications (**120 structured Jira tickets**): Context, Business rules, Design, Acceptance criteria, edge cases documentation, annotated screenshots, workflows
  - Intensive use of **generative AI** to accelerate design, mockup creation and ticket production (**×3 faster**)
  - Complete Roles & Permissions system overhaul: business research, rationalization, "least privilege" architecture, **40% reduction in unnecessary permissions**
- PRODUCT MANAGER OF COLLECTION (EXCEPTIONAL HOMES) - 40 FEATURES DELIVERED, 2500 CLIENTS
  - Operational support for **4 internal developers** in collaboration with another Product Manager: ticket writing, technical clarification, investigation, problem resolution, functional arbitration
  - Reflection and creation of features to enable a different way of searching with **house categories** tested with an AI model
  - Candidate funnel revamp: multi-step application with features such as the ability to cancel one's application, save/resume, automated eligibility verification, status tracking, contextual notifications. **Completion rate: 87%**
  - Coordination with other teams/squads: **Payment Squad** to integrate free trial payment, **User Squad** to integrate authentication and registration with Auth0
  - Data-driven algorithm for Collection eligibility processing and **house ranking**: optimization of display and selection of houses to highlight
  - Collection page exposure within homeexchange.com site: creation of **new touchpoints** for increased exposure. **+25% exposure** thanks to banner display for all eligible members
  - Homepage revamp: main banner of the Collection section

- PRODUCT OPS, OPERATIONS & PROCESS

  - Innovative Slack→Jira automation system: automated workflow collecting user feedback, automatic ticket creation/linking, progress tracking visible in Slack. First of its kind at HomeExchange
  - Request management system: separation of bugs (#bug-report) and features (#run-bo-requests), improved response time for 4 business teams
  - Creation of tools for staging account creation: automation of test and development processes
